

## JIGAWA STATE

MINISTRY OF EDUCATION, SCIENCE AND TECHNOLOGY

FEDERAL REPUBLIC OF NIGERIA

# ANNUAL SCHOOL CENSUS REPORT 2013/2014

# **JIGAWA STATE SCHOOL CENSUS REPORT**

**2013/2014**

Jigawa State Ministry of Education, Science and Technology

## **Preface**

The Jigawa State Ministry of Education, Science and Technology is currently implementing the Education Sector Plan 2008-2018 to improve equitable access to quality education in the state.

The 2013 -2014 Annual School Census (ASC) is the continuous compliance to the decisions reached at 54th National Council on Education (NCE) meeting held at Katsina which urge States and FCT to finance and conduct the ASC. It is also one of the main tools of providing information to assess progress in the implementation of the State Education Sector Plan (SESP) using a set of monitoring indicators. The result is this Annual School Census Statistical Report (ASCSR).

This analytical report, presents the findings of the 2013-2014 ASC. I am certain that the report will serve as an authentic source of information on the status of education in Jigawa State.

It is hoped that stakeholders will use the information provided for planning and decision making.

The Ministry is grateful to our development partners, Education Sector Support Programme in Nigeria (ESSPIN) for the technical support given to education sector in the state.

I wish to congratulate the State EMIS Committee, Planning Departments of State Ministry of Education, Science and Technology (SMoEST), State Universal Basic Education Board (SUBEB), other parastatals and stakeholders at all levels who contributed towards the conduct of the school census and the preparation of this report.

***Prof. Haruna Wakili***

Honourable Commissioner

Jigawa State Ministry of Education, Science and Technology

June, 2014

## **Acknowledgements**

The efforts put in to assemble the 2013/2014 Annual Schools Census (ASC) which will provide statistical information on pre-primary, primary, junior secondary and senior secondary schools in Jigawa State through a single data collection conducted in November 2013, together with other exertions that culminated in this publication imply that a wide range of individuals, groups, and organizations made invaluable contributions. Some have contributed in reviewing the existing questionnaires to enable the instruments capture specific peculiarities of the state.

Specific mention must be made of the Education Sector Support Programme in Nigeria (ESSPIN) which provided technical advice, funded the training, logistics for printing the questionnaires and ensured their delivery to the State Universal Basic Education Board (SUBEB) and Local Government Education Authorities (LGAs).

The success of the data collection stage at the school level was a demonstration of the type of cooperation which is desired of the relevant state agencies: the State EMIS Committee made up of representatives of the State Ministry of Education, Science and Technology, SUBEB, Education Secretaries, Private school Proprietors Association, State Agencies, Civil Society Action Coalition on Education For All (CSACEFA), Federal Inspectorate Services office in the State, Head Teachers of primary schools and Principals of secondary schools. The SUBEB and MOEST are immensely grateful for their invaluable contributions.

At the stage of data analysis, the staff of the EMIS unit at SUBEB and MOEST demonstrated high professional competence in developing extensive education indicators and statistical reports which formed the bulk of this publication. This level of contribution is unprecedented. The SUBEB and MOEST provided computer facilities for data inputting as well as guidance during data analysis and report writing. These immense support and contribution is acknowledged with optimum appreciation.

2013/2014

## **Definitions**

### **Dropout Rate by Grade**

Dropout rate is the percentage of pupils from a cohort enrolled in a given grade at a given school year that is no longer enrolled in the following school year. It measures the phenomenon of pupils from a cohort LGA leaving school without completion, and its effect on the internal efficiency of educational systems. In addition, it is one of the key indicators for analysing and projecting pupil flows from grade to grade within the educational cycle.

### **Gross Enrolment Rate (GER)**

GER is the total enrolment in primary education, regardless of age, expressed as a percentage of the eligible official school-age population (6-11 years in Nigeria). It shows the general level of participation in primary education. It indicates the capacity of the education system to enrol students of that age group. It can also be a complementary indicator to net enrolment rate by indicating the extent of over-aged and under-aged enrolment.

### **Gross Intake Rate (GIR)**

GIR is the total number of new entrants in the first grade of primary education, regardless of age, expressed as a percentage of the population at the official primary school-entrance age (6 years in Nigeria). It indicates the general level of access to primary education. It also indicates the capacity of the education system to provide access to grade 1 for the official school-entrance age population.

### **Net Enrolment Rate (NER)**

NER is the enrolment of the official age group for primary education (6-11 years in Nigeria) expressed as a percentage of the corresponding population. It shows the extent of coverage in a given level of education of children and youths belonging to the official age group corresponding to the given level of education.

### **Pupil-Teacher Ratio (PTR)**

PTR is the average number of pupils (students) per teacher at a specific level of education in a given school year. It measure the level of human resources input in terms of the number of teachers in relation to the size of the pupil population. The results can be compared with established national norms on the number of pupils per teacher.

### **Repetition rate by grade:**

Repetition rate is the percentage of pupils from a cohort enrolled in a given grade at a given school year who study in the same grade in the following school year. It measures the rate at which pupils from a cohort repeat a grade, and its effect on the internal efficiency of educational systems. In addition, it is one of the key indicators for analysing and projecting pupil flows from grade to grade within the educational cycle.

2013/2014

## **1. Background**

In compliance to The *Nigeria Educational Management Information System Policy*, which was approved by the 54th National Council on Education meeting in Katsina in December 2007, Jigawa State established a fully functional Educational Management and Information System unit in the Department of Planning, Research and Statistics of Education Ministry. According to the *Policy*, the National EMIS Committee is responsible, among others, for:

- Ensuring that EMIS is operational and understood uniformly around the country
- Facilitating the sharing of technical information and practices regularly to all institutions that provide primary data for the management of education at any level
- Developing and monitoring compliance with EMIS policies and updating practice
- Clarifying information needs at all levels of the education system and encouraging the flow of data and the training of participants
- Evaluating the performance of the system and recommending actions

In August 2009, the National EMIS Committee approved the ASC Operational Manual, which is based on a census cycle that runs from August to July and also approved a simplified ASC questionnaire for the process. Mid-November was selected as the period for data collection.

The purpose of the school census is to provide yearly data to effectively monitor the state of the education sector and facilitate the use of information for planning and budgeting decisions. This unit has been responsible for the production of the State Annual School Census.

2013/2014

## 2. ASC Information and Coverage

The 2013/2014 ASC process started with the consolidation of the various school lists. This process, like the previous one, also involved the LGAs and parastatals in various iterations. These efforts resulted in a single school list comprehensive of all sectors (public and private) and levels (pre-primary and primary, JSS and SSS). However, after data collection it was discovered, as in the previous case, that several schools were captured that were not in the consolidated school list, while some schools in the list were not captured, at least not with the same name.

Table 2.1 provides the details of the number of schools captured by level.
